man seated at the second-story window of the Art Society building. This woman was about twenty years old or a little more I should say, and had a large hat with flowers around it. She smiled over at me in a pointed manner, and on first catching sight of me lifted her hand and waved it. I couldn't quite decide whether this was an involuntary motion of interest on seeing me or was meant as a sign of encouragement for me to start me flirting with her. I got rather the lat-

ter impression.
"A man was half in sight near the window. I think it was D. G. P., but I am not quite sure. I looked steadily at this woman for a few moments, and glanced away just as the man came to the window to look out. I then kept my eyes away from that window as much as possible. The woman, how-ever, continued for perhaps a half hour or three-quarters, enough longer to sit there and take evident notice of G. P.'s sister, and that they were Finusing themselves after receipt of my last letter to him and at my expense. But later, as I left my house that same woman left hers and looked at me fixedly, and I do not think it was Mrs. Frevert. Now why did she make these advances?

It occurred to me later that when I flirted with her a claim of my having acted in an annoying way might have been circulated to my deriment, I January is our must be careful of what plans this clearing season. blackguard may make to injure me. The theory that he is seeking to do so, however, rests on stronger evidence than the mere incident just described."

Under another date he says: "Called last night again on Phillips. They said he had gone to Pittsfield, Mass. If so my trouble has been in vain. His ignoring my last letter and twice excusing himself is in itself a confession of guilt."

With the publication of "The Second Generation" in 1907, Mr. Phillips came into his own as a novelist. He had previously printed eleven novels, but this one crystallized the scattered ap-preciation of his work, and his voice began to be halled by the critics as a one in American l'terature. They recognized that he was a successful portrayer of big movements in American life, that he had forsaken the paths that could be called well worn. He wrote out of the experience that his years as a reporter and newspaper. writer had given him. He took pains to say that he did not believe in the literary ideals of "the period when the pages of Irving and Cooper correctly mirrored the daily doings, the aspira-tions, the virtues, the sins-if they had sins in those days -- of their contem-

It is said that his fellow-reporters looked forward to the sight of his first work with curlosity and hopeful expectations of mirth. When it arrived there was astonishment, but no mirth, it then appeared that this young man poing quietly about, apparently worried only about lost pajamas, had seen exerybody and noted every salient fact and detail. Then with skill and compelling power he had laid all the underlying springs and causes of action clear, analyzed, weighed and humanized the elements of the conflict so that, instead of a thing temporary and insignificant, it was shown truly as something big and vital.
